SUMMARY

Results-driven DevOps Engineer with 8+ years of experience optimizing CI/CD pipelines, automating infrastructure, and enhancing security for cloud and on-premises environments. Expertise in Kubernetes, Docker, Jenkins, Ansible, and Terraform. Proven ability to reduce deployment times, improve system performance, and strengthen security posture.

SKILLS

- **Cloud Platforms:** AWS (EKS, ECS, EC2, S3, VPC), GCP (GKE), Azure
- **Containerization & Orchestration:** Kubernetes, Docker, Helm
- **CI/CD:** Jenkins, GitLab CI, Argo CD
- **Configuration Management & IaC:** Ansible, Terraform
- **Monitoring & Observability:** Prometheus, Grafana, EFK stack
- **Scripting & Programming:** Python, Bash
- **Other Tools & Technologies:** Maven, SonarQube, Linux (Red Hat, CentOS, Ubuntu), Windows Server, HashiCorp Vault

WORK EXPERIENCE

Senior DevOps Engineer | Acme Corporation, Anytown, CA

June 2020 - Present

- Led the design and implementation of a Kubernetes-based microservices architecture, resulting in a 30% improvement in application performance and a 20% reduction in infrastructure costs.
- Automated the CI/CD pipeline using Jenkins and GitLab CI, increasing deployment frequency by 50% and reducing deployment errors by 40%.
- Implemented Infrastructure as Code (IaC) using Terraform and Ansible, improving infrastructure consistency and reducing provisioning time by 25%.
- Strengthened security posture by implementing DevSecOps practices, including vulnerability scanning, security testing, and secure secret management.

- Built and maintained CI/CD pipelines for multiple applications using Jenkins, Docker, and Kubernetes, enabling faster and more reliable deployments.
- Automated infrastructure provisioning and configuration management using Ansible, reducing manual effort by 30%.
- Implemented monitoring and logging solutions using Prometheus, Grafana, and the EFK stack, improving system visibility and troubleshooting capabilities.

- Managed and maintained Linux and Windows servers in a virtualized environment.
- Implemented system monitoring and performance tuning, ensuring high availability and optimal performance.
- Provided technical support and troubleshooting for end-users.

PROJECT

- **Automated Deployment of a Web Application on Kubernetes:** Developed a CI/CD pipeline using Jenkins and Kubernetes to automate the build, test, and deployment of a web application, resulting in a 40% reduction in deployment time.
- **Migrated On-Premises Applications to AWS:** Migrated legacy applications to AWS cloud, leveraging EC2, S3, and RDS, resulting in improved scalability and cost savings.

EDUCATION

- **California State University, Anytown, CA** Bachelor of Science in Computer Science May 2016

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA) July 2023
- AWS Certified DevOps Engineer - Professional Sep 2021
- HashiCorp Certified: Terraform Associate Oct 2020
